Summary — Senior Product Manager with 6+ years shipping products across fintech, B2B SaaS, and marketplaces - scaled lending from Rs.30 Cr to Rs.100 Cr and built enterprise platform from 0 to 1. Hands-on with Claude Code, Cursor, and agentic AI tools, independently shipped a full-stack AI product that grew to 5 million plus views in 2 weeks. Equally comfortable defining strategy with leadership and debugging a workflow with engineers.

Skills

Core: Product Strategy, Roadmapping, PRDs, A/B Testing, GTM Execution, User Research, Stakeholder Management

Technical: SQL, REST APIs, System Design, RBAC, Offline-First Architecture, Webhooks, AI/ML Integration

Tools & Analytics: Cursor, Claude Code, Lovable, n8n, Supabase, Github, Google Analytics, JIRA, Figma, Amplitude, Metabase, Postman, Confluence

Domains: Payments, Lending, B2B SaaS, Wallets, KYC, ERP, E-commerce, Agri-Tech

Experience

Senior Product Manager - KJBN Labs Pvt Ltd

Nov 2024 - Apr 2026

- Defined product strategy and led 0-to-1 development of a multi-tenant enterprise SaaS platform, driving architecture decisions and execution from concept through global rollout across multiple business units.
- Designed an accounting and ledger system with audit trails and ERP integration, enabling enterprise-grade finance workflows and reducing manual reconciliation effort for customers.
- Shipped KYC and contract eligibility automation, cutting manual verification effort by 50% and accelerating compliance turnaround from days to hours.
- Architected role-based access control (RBAC) and configurable workflow engine, enabling secure multi-persona usage and reducing onboarding time for new business units.
- Delivered an offline-first mobile application with intelligent sync, achieving 100% field operations continuity in low-connectivity environments across distributed teams.

Product Manager - Bijak (B2B Agri-Commerce Platform)

Feb 2022 - Oct 2024

- Scaled the lending business from Rs.30 Cr to over Rs.100 Cr in disbursements by introducing a Loan Management System (LMS) with automated credit decisioning and disbursement workflows.
- Built a wallet system with virtual account integration, automating payouts and driving a 23% increase in DAU and 40% improvement in user retention on a platform processing 10,000+ monthly trades.
- Designed a real-time profitability (XIRR) tracking system providing continuous monitoring of projected vs. actual returns, resulting in a 1.7% average improvement in trade margins.
- Reduced cash transactions by 70% by introducing digital payment at delivery with a gamified workflow, significantly minimizing payment discrepancies.
- Improved gross margins by 4% through automated flash sale logic that reduced A-grade to B-grade stock transfers by 17%, directly impacting unit economics.
- Led a cross-functional team of 27 (engineering, design, QA, ops) using Agile/Scrum, owning 100+ deployment cycles. Recognized as top performer for 2 consecutive review cycles.

Co-Founder - VP Mart Pvt Ltd

Jun 2020 - Jan 2022

- Built a hyperlocal marketplace from scratch with dual apps (Customer and Merchant), covering 7+ categories including groceries, restaurants, and services - launched MVP in 3 months.
- Owned end-to-end product lifecycle from user research and PRDs to wireframes, development, and GTM strategy, onboarding 41 merchants in the first 4 months.

- Launched and scaled a food chain to profitability within 6 months by iterating on a data-driven menu strategy (20+ iterations, 60%+ gross margin) and optimizing CAC to under Rs.100.
- Drove 25% improvement in customer retention through personalized customer experience initiatives and targeted acquisition via Instagram campaigns and affiliate partnerships.

Side Projects

Anime Studio - AI Anime Content Creation Platform

Personal Project

Web: animestudio.work | Instagram: [@animeishq.official](https://www.instagram.com/animeishq.official)

- Built a full-stack AI-powered anime story creation web app solo using Claude Code, Next.js, Supabase, and OpenAI image generation, shipping end to end without a developer or designer.
- Designed complete user experience including character builder, scene generation, credit system, and mobile-responsive PWA, making all technical and product decisions independently.
- Launched Anime Ishq, an anime content channel powered by the tool, growing to 10K followers and 5 million plus views in 2 weeks, validating the product in a real content use case.

JobMatch - AI Job Fit Scorer

Personal Project

- Built a Chrome extension that scores CV-to-job fit across 7 weighted dimensions and returns an honest 0-100 match score with gap analysis and a clear apply or skip recommendation.
- Designed the scoring engine using Claude API with structured JSON output, calibrated to avoid score inflation and flag unrealistic job descriptions.
- Deployed the backend API on Railway and built the extension UI using Cursor and Claude Code, shipping end to end without a development team.

Job Pipeline - Job Application Tracker

Personal Project

- Built a browser sidebar to track job applications, log status updates, and manage follow-ups without leaving the current tab.
- Designed and shipped the full stack using Next.js, Supabase for persistence and cross-device sync, and Lovable for rapid UI iteration.
- Used Cursor and Claude Code throughout the build for speed and code quality.

Education

PES University, Bangalore

2015 - 2019

B.Tech in Electronics and Communication Engineering

Certifications

- Certified Scrum Product Owner (CSPO) -Scrum Alliance
- Google Data Analytics Professional Certificate -Coursera
